This ultra compact speaker, the smallest of the Aurea IW range, can be used as a screen, surround or ceiling system for any small sized room. Its narrow depth allows it to be embedded inside the wall or inside the ceiling to achieve a better looking result. This model's performance, together with its state-of-the-art European components for both bass and treble that deliver a linear response up to 20Kz, make it a superb In Wall system of the Aurea family. It features a high resistance polyurea coating. There is an option of metallic coverings or fabric grills painted in the customer color choice.
