

AURA

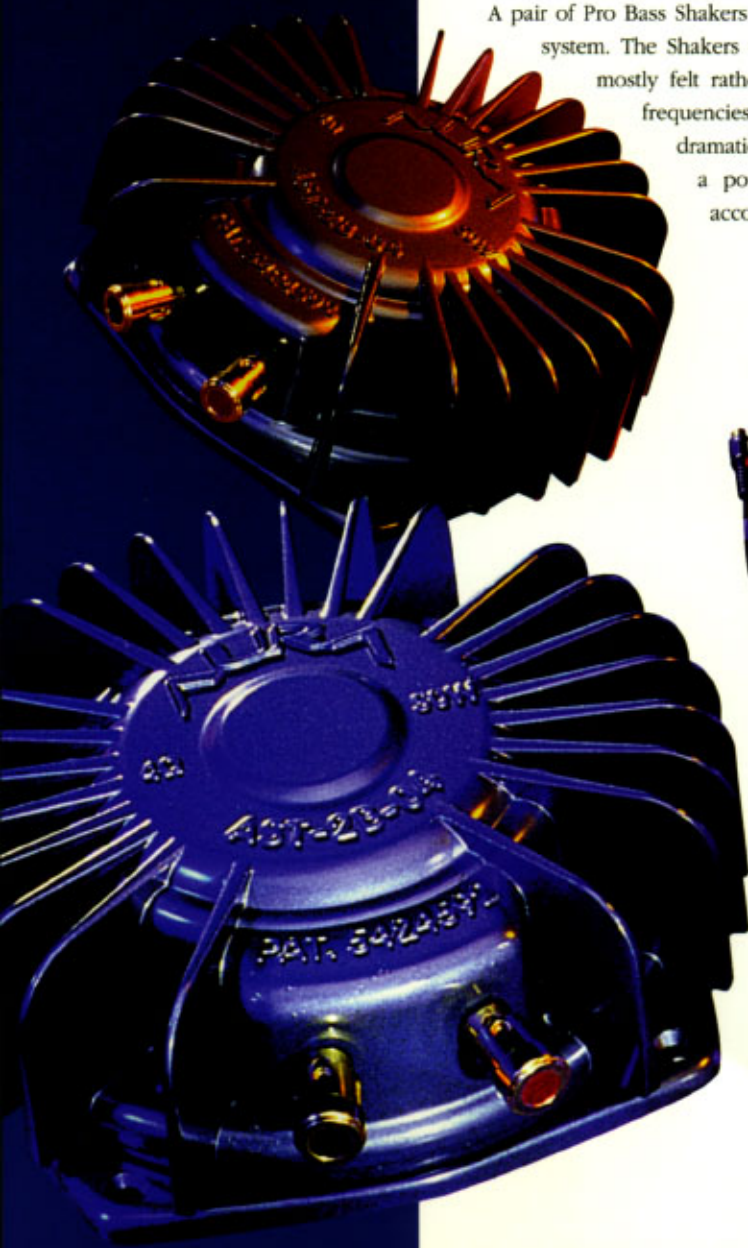

BASS SHAKER PLUS

The Ultimate Upgrade

The Bass Shaker Plus from Aura is a fully integrated car audio bass enhancement system. It comes complete with a pair of Pro Bass Shakers, a remote level control, and a state-of-the-art, highly efficient digital amplifier.

The latest in patented technology and innovation, the Bass Shakers produce up to four times more "felt" bass than a conventional subwoofer without sacrificing usable space or modifying your present system. And because Bass Shakers mount directly underneath a car's seats, they're ideal for use in any vehicle.

A pair of Pro Bass Shakers connects to AuraSound's 100-watt digital amplifier, designed specifically for this system. The Shakers connect to the amp like speakers and emphasize the concept that low bass is mostly felt rather than heard. When properly installed, Pro Bass Shakers respond to all low frequencies of music from 100Hz down, causing the surrounding areas to resonate with the dramatic intensity of deep "felt" bass. Simply stated, the Bass Shaker Plus system delivers a powerful sensation of distortion-free bass without the damaging effects often accompanied by high sound pressure levels.

Features

- Two Pro Bass Shakers
- AuraSound 100-Watt Class D digital amplifier featuring selectable crossover points
- Remote level control
- Takes up no usable space allowing easy installation
- Fully integrated bass enhancement system
